SO THE PUBLIC MAY KNOW:

ISSUE:

- The income requirement for cityhood under RA 9009 is P100M locally generated income. The 16 municipalities failed to comply with the income requirement when they applied for cityhood.
- Some of these municipalities even have a locally-generated income of less than P10 million. In fact, one municipality failed to comply not only with the income requirement but also with the population requirement.

FACTS:

- **November 18, 2008** – the Supreme Court issued its decision in the LCP Case and declared as **UNCONSTITUTIONAL** the sixteen (16) cityhood laws.
- **March 31, 2009** - the Motion for Reconsideration was denied with finality for lack of merit. The Court stated that **"NO FURTHER PLEADINGS SHALL BE ENTERTAINED"**
- **April 28, 2009** - the Second Motion for Reconsideration was denied for being a prohibited pleading. The Court again stated that **"NO FURTHER PLEADINGS SHALL BE ENTERTAINED"** and added that **"AN ENTRY OF JUDGEMENT BE MADE IN DUE COURSE"**
- **May 21, 2009** - the entry of judgment was issued stating that the decision is now **FINAL AND EXECUTORY**
- **June 30, 2009** - the Department of Budget and Management issued LBM No. 61 providing for the **FINAL IRA ALLOCATION FOR 2009** as a result of the reversion of 18 newly-created cities to municipalities pursuant to Entry of Judgment of the Supreme Court

**The LCP Case had already been DECIDED WITH FINALITY
by the Supreme Court.**

**The sneaky tactics being employed by the 16 municipalities to reverse
the decision of the Court should be condemned for violating the rule
of law and stability of the judicial system.**

**We firmly stand by the rule of law and we will continue to be vigilant
in guarding the rights vested upon us by the final decision and
in upholding the respect due to the highest court of the land.**

The results on West countries, and the results on the 12, show that the impact on real wages is not significant. This may be explained by the fact that the institutional arrangements in the general firm sector are not changing, thereby reducing the effect of the frequency effect on the spread of non-competitiveness. In Germany, 57% of the firms are in the 12.

It is a common mistake to think of a "model" as a "theory" or a "hypothesis." A model is a representation of a system, process, or phenomenon. It is a simplified version of reality that allows us to understand and predict the behavior of the system. Models can be used in many ways, including to test hypotheses, to explore the consequences of different assumptions, and to communicate complex information in a clear and concise way.

Shakespearean frustration

Political
Takes

It's a common sight: a Shakespearean play being performed on a stage. The actors are dressed in period costume, and the audience is seated in a grand hall. But what if the play was performed in a modern setting, with the actors dressed in contemporary clothing and the audience seated in a modern theater? Would the play still be as powerful? Would it still be as relevant? This is the question that Shakespearean frustration poses.

Shakespearean frustration is a phenomenon that occurs when a Shakespearean play is performed in a modern setting. The play is often performed in a modern theater, with the actors dressed in contemporary clothing. This can lead to a disconnect between the play and the audience, as the audience may not be able to relate to the characters or the setting. This is the essence of Shakespearean frustration.

This can lead to a disconnect between the play and the audience, as the audience may not be able to relate to the characters or the setting. This is the essence of Courtesy does an Amazon.

Courtesy does an Amazon is a phenomenon that occurs when a Shakespearean play is performed in a modern setting. The play is often performed in a modern theater, with the actors dressed in contemporary clothing. This can lead to a disconnect between the play and the audience, as the audience may not be able to relate to the characters or the setting. This is the essence of Courtesy does an Amazon.

Of the new and never previously seen star

Metaphors

It's a common sight: a man and a woman in period costume, standing in a grand hall. The man is dressed in a long coat, and the woman is dressed in a long gown. But what if the man and woman were dressed in contemporary clothing, and the background was a modern setting? Would the scene still be as powerful? Would it still be as relevant? This is the question that Of the new and never previously seen star poses.

Figure 1 illustrates the experimental setup for measuring the time delay of a quantum state. The setup involves a sequence of quantum operations: an input state $|\psi\rangle$, followed by a Hadamard gate (H), a phase shift gate (ϕ), and a final Hadamard gate (H). The output is measured in the computational basis, yielding probabilities $P(0)$ and $P(1)$. The phase shift gate is labeled with a parameter α .
